Appendix B: 2015 CMS Quality Reporting Measures

*New measures finalized in the 2015 PFS Final Rule

Reporting quality metrics under Group Reporting (through the UMACO) will satisfy an individual practice's PQRS reporting requirements, as well as, the Clinical Quality Measures (CQMs) that must be submitted for Meaningful Use. Therefore, practices participating in the ACO will not have to report PQRS or CQM metrics to CMS. Practices will still be responsible for reporting individually on their Core and Menu measures (required under Meaningful Use) to CMS.
