

United Medical and Cerner Corporation proudly announces DHIN Interface!

Connecting the Community

As the Delaware Health Information Network (DHIN), DHIN is dedicated to better communication for better health. Their vision, which is tightly aligned with Cerner Corporation is to share real-time clinical information among all health care providers (office practices, hospitals, labs, diagnostic facilities, etc.) across the state to improve patient outcomes and patient-provider relationships, while reducing service duplication and the rate of increase in health care spending.

United Medical, a trusted medical billing and management consulting firm, serves physician practices in Delaware, Maryland, Pennsylvania and New Jersey partners with Cerner Corporation for their practice management and EMR solutions.

United Medical and Cerner Corporation are excited to announce that Cerner Ambulatory is now a DHIN certified Electronic Health Record (EHR) partner. Our provider connections will further facilitate healthcare efficiency and the transformation of medical practices throughout Delaware.

Simplify your EHR Experience

Cerner provides a one-stop-shop for solutions and services to meet the comprehensive needs of its ambulatory physicians. Inclusive of seasoned implementation methodologies and optimization, Cerner commits to working with providers as they adopt the solutions, leverage new capabilities, and move toward "Meaningful Use." Cerner's simplified packaging and industry-leading Application Service Provider (ASP) model enables a transparent sales process, streamlined delivery timelines, as well as ongoing maintenance, support and training.

With the ASP offering, you can access solutions anywhere via a high-speed Internet connection. Cerner hosts your data at our state-of-the-art data center and provides all maintenance, upgrades, support and training for your solutions. Let Cerner take care of the technology while you take care of your patients.

Cerner Ambulatory

In creating the EHR, Cerner studied how clinicians like you work and structured the solution to help you practice more efficiently. With the Cerner solution, you can access complete clinical and administrative information with a minimal number of clicks. In fact, physicians who use our solution have seen the time they spend on paperwork drop by as much as two hours per day.

The PowerChart Ambulatory EHR (Cerner Millennium PowerChart/PowerWorks EMR 2007.19) is CCHIT 2008 certified and preliminary 2011 ARRA certified solution designed to automate the workflow and clinical functions of your practice. The solution helps you gain a more complete picture of a patient's needs, information that helps ensure the best clinical outcome. The solution is designed with the following features to help you work more efficiently:

- Structured and codified documentation enables and satisfies PQRI and NQF quality-reporting standards.
- Clinical Summary screen allows you to view pertinent patient information, order and manage medications and orders, as well as document patient visits.

Financial Incentives Available

American Recovery and Reinvestment Act (ARRA)

- Each provider may receive between \$44,000—\$65,000 for the meaningful use of a certified EHR.

ePrescribing Incentive (MIPPA)

- Providers may receive up to a 2% rebate of their Medicare charges for a given year.
