

We are excited to announce that 60 of United Medical's ambulatory sites have achieved the 'Stage 6' designation based on the HIMSS Analytics Ambulatory EMR Adoption Model (EMRAM)!

What does this mean for our clients and our patients? The EMRAM score guide provides comparisons for organizations to boost their compliance with Meaningful Use. This information provides guidance on achieving even higher results in Meaningful Use compliance.

This recognition validates our efforts and vision to improve patient safety, quality and continuity of care within our ambulatory sites. With the advancement of our 60 designated clients, a total of 88 locations, our mission to help shape and improve population health and continuity of care is strengthened as we advance into a fully-functional paperless EMR network.

We congratulate our clients, the Cerner Corporation, our professional team and our leader Kemal Erkan, who is truly visionary for making this distinction a possibility. It is an honor and a meaningful achievement for all of us.

About HIMSS

Healthcare Information and Management Systems Society (HIMSS) is a global, cause-based, not-for-profit organization focused on better health through information technology (IT). HIMSS leads efforts to optimize health engagements and care outcomes using information technology. To learn more about HIMSS, please visit: www.himss.org
